

An educational outreach program on our amazing Earth.

The CenturyLink Earth Balloon is a 16' inflatable model of our Earth that travels to schools across our region, providing an interactive experience in which students can build knowledge of geography, earth and environmental science.

Fee: \$100 per 45-min. presentation for a class of up to 25 students. Minimum of 2 shows, maximum of 8, can be scheduled per day.

We also participate in Earth Day events, international festivals, summer programs and corporate events.

Stuffee®

An educational outreach program on health and nutrition.

Do you have a big zipper down the front of your chest? Can you unzip your body and take out your insides and look at them? There is someone who can... STUFFEE can!

Stuffee is a plush, super-sized, kid-friendly, doll that makes learning about your body fun!

The 45-minute presentation guides children's investigation of the individual organs, how organs function together in the digestive, respiratory and circulatory systems, and what people can do to keep their bodies healthy. Designed for a classroom or small group, the presentation encourages students to handle Stuffee's soft-stuffed organs, listen to Stuffee's heartbeat and appreciate the size and position of their own internal organs.

Fee: \$100 per presentation for a class of up to 50 students. Minimum of 2 shows, maximum of 8, can be scheduled per day.

We also participate in health fairs, wellness expos and fitness events.
